PROFESSIONAL SUMMARY

Computer Science graduate (2026) specializing in Full Stack Web Development using React and ASP.NET Core. Experienced in building responsive web applications from database design and backend APIs to modern frontend interfaces and deployment. Passionate about software engineering, problem solving, and developing practical solutions for real-world challenges.

TECHNICAL SKILLS

Frontend: React, JavaScript (ES6+), HTML5, CSS3, Material UI, Bootstrap, Responsive Design, React Router DOM, Axios

State Management: Zustand, TanStack React Query

Backend: ASP.NET Core Web API, Entity Framework Core, REST APIs, JWT Authentication, Refresh Tokens, LINQ

Database: PostgreSQL, SQL Server, Neon

Tools: Git, GitHub, Docker, Vite, Postman, Render

Programming: C#, Python, Java, C++, SQL

Software Engineering: OOP, Data Structures, Algorithms, Problem Solving, Testing

Languages: Arabic (Native), English (Intermediate)

PROFESSIONAL EXPERIENCE

Frontend Development Intern – ASAL Technologies (4 Months)

- Developed responsive web pages using HTML, CSS, and JavaScript.
- Applied Git and GitHub for collaboration and version control.
- Worked on frontend tasks in a structured development team.
- Gained practical experience with React fundamentals and modern workflows.

Frontend Training Project – Knowledge Academy

- Built a complete React storefront project as the final training project.
- Developed reusable components and integrated REST APIs.
- Focused on responsive UI development and modern frontend architecture.

Problem Solving Instructor – IT Club, Arab American University

- Designed and delivered a complete Problem Solving Level 2 course for AAUP students.
- Prepared lectures, programming contests, and practice materials.
- Taught algorithms and data structures including Stack, Queue, Set, Priority Queue, Maps, Prefix Sum, Binary Search, Greedy, Two Pointers, and Bitwise.
- Mentored students and tracked their learning progress throughout the course.

PROJECTS

Course Points Management System ([Live Demo](#))

React | ASP.NET Core | PostgreSQL | Material UI | JWT

- Built a complete course management system from scratch to replace Excel-based course administration.
- Designed the database schema and implemented the backend using ASP.NET Core Web API and Entity Framework Core.
- Developed the frontend using React, Material UI, Zustand, and Axios.
- Implemented JWT Authentication, Refresh Tokens, role-based authorization, attendance management, points tracking, leaderboards, and CSV export.
- Deployed both frontend and backend using Render with PostgreSQL hosted on Neon.

CS Hub – Student Support Platform ([Live Demo](#))

React | Material UI

- Developed a centralized platform that provides study materials and academic resources for Computer Science students.
- Built a responsive React frontend with reusable components.
- Integrated backend APIs to manage dynamic content.
- Improved accessibility and navigation for students across different courses.

Moon Storefront – React E-Commerce Frontend ([Live Demo](#))

- Built a modern responsive storefront using React and Material UI.
- Developed Home, Shop, Product Details, Cart, Checkout, Wishlist, Profile, and Authentication pages.
- Implemented Light/Dark Mode, Arabic/English localization, and protected routes.
- Integrated REST APIs using Axios and React Query.
- Managed application state using Zustand.

EDUCATION

Bachelor of Computer Science – Arab American University Palestine (2026)

GPA: 3.16 / 4.0

CERTIFICATIONS & ACHIEVEMENTS

- Problem Solving Level 3 – Gaza Sky Geeks (2025)
- Prompt Engineering Certification – Gaza Sky Geeks (2025)
- Third Place – Codex Competition, Arab American University (2025)
- Participant – Hebron Code Jam (2025)
- AWS Course – IT Club & Gaza Sky Geeks (2024)
